EXPERIENCE

College Ambassador | Techfest, IIT Bombay Jun 2026 – Present

- **Represented Techfest IIT Bombay**, Asia's largest science and technology festival, by leading campus outreach and engagement initiatives to promote competitions, workshops, and technical events across student communities.
- **Conducted market research**, competitor analysis, sponsorship research, and partnership mapping, preparing professional strategy reports for corporate outreach, business development, and event collaborations.
- **Designed and developed web assets**, including landing pages, promotional content, and technical project deliverables supporting Techfest campaigns.
- **Planned and executed marketing strategies**, collaborating with technical clubs, student organizations, and online communities to increase awareness and participation.
- **Delivered data-driven recommendations** by creating presentation decks, reports, outreach strategies, and execution roadmaps using AI-powered research and productivity tools.

TECHNICAL PROJECTS

AI Career Mentor | Live Demo | Solo Full-Stack Developer March 2026 – Present

- **Architected a production-grade multi-agent AI platform** using LangGraph, orchestrating 7 specialized AI workflows for resume intelligence, career planning, interview preparation, voice coaching, and market analysis.
- **Designed a parallel DAG orchestration pipeline** executing independent AI agents concurrently, reducing end-to-end workflow latency by ~60% while maintaining structured state management and deterministic result aggregation.
- **Implemented a hybrid Retrieval-Augmented Generation (RAG) pipeline** combining semantic vector search (ChromaDB) with metadata-aware retrieval to improve response grounding, reduce token consumption, and optimize context retrieval efficiency.
- **Built scalable backend services** using FastAPI, PostgreSQL, Redis, and WebSockets/SSE, enabling real-time AI streaming, persistent session management, caching, authentication, and high-concurrency communication.
- **Integrated multiple LLM providers** (Groq, NVIDIA NIM, Gemini Live) with provider failover, validation pipelines, and structured output enforcement to improve reliability and production resilience.
- **Engineered enterprise-grade software practices** including Dockerized deployment, CI/CD automation, comprehensive testing, observability, and API validation, resulting in a maintainable and production-ready AI application.

VolunteerIQ | Live Demo | Lead Backend Developer • Team ClutchCode Mar 16, 2026 – Apr 13, 2026

- **Developed an AI-driven crisis-response coordination platform** for NGOs (submitted to Google Solution Challenge 2026) converting survey uploads into geospatially-mapped tasks on Mapbox GL.
- **Engineered backend matching algorithms** using Gemini 1.5 Pro to analyze field data and map tasks, ranking volunteers based on skills, availability, and geographic proximity.
- **Built secure FastAPI REST endpoints** and Firestore integrations with server-side verified Firebase Google Authentication.
