## EDUCATION

**B.Tech in Computer Science & Engineering • ITER, SOA University, Bhubaneswar** **CGPA: 9.11/10** | 2024 – 2028  
**Class XII (PCM with IT) • Odisha Board of Secondary Education** **85%** | 2022 – 2024

## EXPERIENCE

**Campus Ambassador | E-Cell, IIT Kanpur • Remote** Dec 2025 – Jan 2026  
• Promoted IIT Kanpur's E-Summit events at ITER, SOA University through active social media campaigns, campus networking, and community-building initiatives.

## TECHNICAL PROJECTS

**AI Career Mentor | Solo Full-Stack Developer** March 2026 – Present  
• Architected a decoupled microservices system with a Next.js 14 SPA on Vercel and a FastAPI gateway on Render, utilizing Neon Serverless Postgres and Upstash Redis for high-performance data operations.  
• Designed a parallel LangGraph DAG for multi-agent reasoning, with multi-provider routing (Groq Llama 3.3, NVIDIA NIM, Gemini) and fallback circuit-breakers to ensure 100% platform availability.  
• Optimized memory footprint by engineering a Hybrid Semantic RAG system (ChromaDB + in-memory SequenceMatcher fallback) to prevent OOM crashes on resource-constrained 512MB RAM Render containers.  
• Developed a real-time full-duplex Hinglish Voice Coach using Gemini Live WebSocket API (16/24kHz audio) and an interactive 7-phase mock interview FSM with Monaco Editor code execution.  
• Built a secure Google OAuth 2.0 system with JWT refresh token rotation, SlowAPI rate-limiting, and a whitelisted Admin Observation & Telemetry Console tracking active WebSocket connections.  
• Established a robust CI/CD pipeline using GitHub Actions, executing frontend builds and backend pytest (106 unit tests) with automatic package audits (pip-audit) and GHCR container deployment.

**VolunteerIQ | Lead Backend Developer • Team ClutchCode** Mar 16, 2026 – Apr 13, 2026  
• Developed an AI-driven crisis-response coordination platform for NGOs (submitted to Google Solution Challenge 2026) converting survey uploads into geospatially-mapped tasks on Mapbox GL.  
• Engineered backend matching algorithms using Gemini 1.5 Pro to analyze field data and map tasks, ranking volunteers based on skills, availability, and geographic proximity.  
• Built secure FastAPI REST endpoints and Firestore integrations with server-side verified Firebase Google Authentication.
