

Anil Pradhan

Software Engineer | Backend & AI

Backend-focused Computer Science undergraduate with hands-on experience building production-grade AI applications using FastAPI, LangGraph, RAG, Docker, and cloud technologies. Passionate about scalable backend architecture, distributed systems, and AI-powered software.

Education

Institute of Technical Education & Research (ITER)

Siksha 'O' Anusandhan (SOA) University, Bhubaneswar

Bachelor of Technology (B.Tech), Computer Science & Engineering

2024 - 2028 | CGPA: 9.11/10

Council of Higher Secondary Education (CHSE), Odisha

Class XII (PCM with IT)

2022 - 2024 | 85%

Experience

College Ambassador (Corporate Projects Program) | Techfest, IIT Bombay

Jul 2026 - Present

- Selected as a College Ambassador for Techfest, IIT Bombay, representing one of Asia's largest science and technology festivals.
- Completed industry-sponsored corporate projects across web development, business strategy, and market research in collaboration with partner organizations.
- Qualified for Round 2 of the FlowFinance Growth Strategy & Business Development Challenge by developing a business strategy presentation and market analysis.
- Collaborated with multidisciplinary teams while delivering project submissions within defined deadlines.

Technical Projects

AI Career Mentor | Live Demo | GitHub

Mar 2026 - Present

Solo Full Stack Developer

- Engineered a parallel 4-agent LangGraph pipeline with a concurrent fan-out/fan-in architecture, reducing end-to-end latency by 75% (4 min → 60 sec) while streaming real-time logs via SSE.
- Built a WebSocket-based mock interview engine using FastAPI and an 8-stage FSM; dynamically evaluates coding and system design skills with adaptive difficulty based on target company profiles.
- Developed 'Anya', a full-duplex multimodal AI voice coach utilizing Gemini Live API over WebSockets; engineered Hinglish system tuning, 16kHz audio streaming, and user interrupt handling.
- Engineered a resilient multi-LLM provider registry (Grok, Cerebras, OpenRouter) featuring automatic failover, custom circuit breakers, and Redis-backed rate limiting to guarantee 99.9% uptime.
- Designed a resource-optimized ChromaDB RAG engine with an in-memory mock database fallback, preventing OOM crashes on 512MB RAM cloud platforms (Render), validated via 116 tests.

Tech: FastAPI • LangGraph • Next.js • ChromaDB • Redis • Docker • Gemini Live • ONNX

TaskPilot AI | Live Demo | GitHub

Jun 2026 - Jul 2026

Integration Lead | Team IdeaForge

- Architected a multi-agent engineering productivity platform integrating 7 fragmented developer tools (Jira, GitHub, Slack, Email, Calendar, Meetings, and Incidents), reducing manual task tracking by ~2 hours/day.
- Designed a hybrid AI task extraction pipeline combining heuristic rules, fuzzy matching, and LLM reasoning (Qwen), recovering 35% more hidden action items while reducing LLM inference costs by 75% through selective AI execution.
- Built a concurrency-safe orchestration backend using FastAPI, SQLite WAL mode, and Redis, enabling reliable parallel multi-agent execution with real-time P1 incident reprioritization in under 15 seconds.
- Developed a self-healing workflow engine with automated stale-run recovery and an AI-powered quality evaluator that validated task completeness, actionability, and generated context-aware follow-up questions.

Tech: FastAPI • LangGraph • React • SQLite • Redis • LLMs

Technical Skills

Languages: Python, Java, JavaScript, SQL
Backend: FastAPI, REST APIs, WebSockets, LangGraph, SQLAlchemy, Pydantic
Databases: PostgreSQL (Neon), SQLite, Redis (Upstash), ChromaDB
DevOps & Cloud: Docker, GitHub Actions (CI/CD), Render, Vercel
Monitoring: Prometheus, Sentry

Frontend: React, HTML, CSS, Tailwind CSS, Axios
AI / GenAI: RAG, LangGraph, Gemini Live API, Groq, NVIDIA NIM, Cerebras
Authentication & Security: JWT, Google OAuth 2.0, bcrypt, CORS, Rate Limiting
Developer Tools: Git, GitHub, Postman, Swagger UI, VS Code

Achievements & Certifications

- Finalist, Dell FutureMinds AI Hackathon 2026 - Team IdeaForge, shortlisted for the Grand Finale to present TaskPilot AI at Dell Technologies, Bengaluru.
- Solved 200+ DSA problems across LeetCode & GeeksforGeeks; earned the GFG 160 Days of Code T-shirt.
- Certifications:** Microsoft Career Essentials in Software Development, Cisco Python Essentials 2, HackerRank Python (Basic) and Java(Basic), IBM AI Fundamentals, Anthropic Claude 101.
- Developed production-grade AI solutions for Microsoft AI DevDays, Amazon Nova AI Challenge, and Google Solution Challenge.
- Completed Google Cloud Arcade (75+ Arcade Points) through hands-on Google Cloud labs.
