PROJECTS

AI Career Mentor Feb 2026 – Present
Live: ai-career-mentor-anil.vercel.app
Next.js 14 · FastAPI · LangGraph · ChromaDB · PostgreSQL · Redis · Groq · NVIDIA NIM · Gemini 2.5 Flash · Docker
► Built a production-grade AI career platform integrating 6 AI workflows (Resume Intelligence, Career Roadmaps, Market Analysis, LinkedIn Optimization, Mock Interviews, and Real-Time Voice Coaching) using Next.js, FastAPI, LangGraph, PostgreSQL, Redis, and ChromaDB.
► Architected a LangGraph-based parallel DAG orchestration engine with fan-out/fan-in execution, enabling concurrent resume and market analysis before generating personalized career strategies and learning roadmaps.
► Engineered a multi-provider AI infrastructure with intelligent routing, circuit breakers, and fallback chains across Groq, NVIDIA NIM, and Google Gemini, ensuring high availability under provider failures.
► Implemented a RAG pipeline with ChromaDB vector storage and in-memory keyword fallback, ensuring uninterrupted AI recommendations during vector database failures and Render free-tier OOM constraints.
► Developed a real-time WebSocket interview platform powered by a 7-phase FSM, supporting adaptive technical interviews, automated scoring, and feedback generation — plus a full-duplex voice AI assistant using Gemini Live API with real-time audio streaming and JWT-secured WebSockets.
► Deployed via Docker, GitHub Actions CI/CD, Vercel, Render, Neon Postgres, and Upstash Redis — 102 automated tests, production-grade monitoring, caching, authentication, and rate-limiting. 254+ commits, solo-built over 5–6 months.

VolunteerIQ Mar 2026 – Apr 2026
Live: volunteer-iq-clutchcode.vercel.app
Next.js 14 · FastAPI · PostgreSQL · Gemini 2.5 Flash · Groq · Firebase Auth · Mapbox GL · Docker
► Developed backend APIs and AI services for an NGO coordination platform, enabling automated survey analysis, task generation, volunteer matching, and contextual AI-powered assistance.
► Built multi-format document processing pipelines (PDF, CSV, DOCX, TXT) integrated with Gemini AI and Groq fallback mechanisms to ensure reliable humanitarian intelligence workflows.
► Designed secure and scalable backend infrastructure using FastAPI, PostgreSQL, SQLAlchemy, Firebase authentication, Docker, and REST APIs, supporting real-time NGO operations and volunteer management.
