EDUCATION

Siksha 'O' Anusandhan University (ITER) | B.Tech in Computer Science & Engineering Bhubaneswar, Odisha | 2024 – 2028
• **CGPA: 9.11 / 10.0** (Current Status) Coursework: Data Structures, Algorithms, Systems Design, DBMS

TECHNICAL SKILLS

- **Languages:** Python, Java, JavaScript (ES6+), SQL
- **AI & RAG:** LangGraph, LangChain Core, Gemini Live API, ChromaDB (Vector Store), Groq, NVIDIA NIM, OpenAI API
- **Backend & APIs:** FastAPI, WebSockets (Full-Duplex), RESTful APIs, Pydantic, SQLAlchemy 2.0, Uvicorn, SlowAPI, Axios
- **Databases & Infra:** PostgreSQL (Neon Serverless), Upstash Redis, SQLite, Docker, GitHub Actions (CI/CD), Vercel, Render.com
- **Developer Tools:** Git, GitHub, Linux, Swagger UI, Postman Test Suite, VS Code, AntiGravity IDE

TECHNICAL PROJECTS & EXPERIENCE

AI Career Mentor | Solo Full-Stack Developer Feb 2026 – June 2026

- Orchestrated 6 specialized AI workflows (Resume Intelligence, Roadmaps, Market Explorer, LinkedIn Optimizer, WebSocket Mock Interview Engine, and Gemini Live Voice Coach) on a Next.js 14 SPA and FastAPI gateway.
- Designed a parallel LangGraph DAG for multi-agent reasoning, with multi-provider routing (Groq, NVIDIA NIM, Gemini) and deterministic fallback chains/circuit-breakers to guarantee 100% platform availability.
- Built a real-time Hinglish Voice Coach powered by the Gemini Live Multimodal WebSocket API with 16/24kHz full-duplex audio and implemented a 7-phase mock interview FSM with code execution via WebSockets.
- Implemented a hybrid RAG system utilizing ChromaDB paired with an in-memory SequenceMatcher fallback to prevent OOM errors on Render's 512MB RAM containers. Achieved 106 passing pytest unit tests.
- Developed a secure OAuth 2.0 system with JWT rotation and a Whitelisted Admin Telemetry & Observability Console backed by Upstash Redis to track active user and WebSocket connections in real-time.

VolunteerIQ | Lead Backend Developer • Team ClutchCode Mar 2026 – Apr 2026

- Developed an AI-driven crisis-response coordination platform for NGOs (submitted to Google Solution Challenge 2026) converting survey uploads into geospatially-mapped tasks on Mapbox GL.
- Engineered backend matching algorithms using Gemini 1.5 Pro to analyze field data and map tasks, ranking volunteers based on skills, availability, and geographic proximity.
- Built secure FastAPI REST endpoints and Firestore integrations with server-side verified Firebase Google Authentication.

S.I.A — Super Intelligent Assistant | Solo Developer Jan 2026 – Feb 2026

- Engineered a local Windows desktop assistant v5.0 using a LangGraph ReAct agent that autonomously decides tool execution, controlling native OS volume, brightness, and screenshots via Win32 APIs.
- Integrated Selenium for browser automation with persistent Chrome profiles, coupled with SQLite for settings and ChromaDB for local session memory. Leveraged Edge-TTS voice fallbacks.

ACHIEVEMENTS & CODING PROFILE

- **Coding Achievements:** Solved 200+ DSA problems across LeetCode & GeeksForGeeks; completed the GFG 80 Days Challenge (Arrays, Recursion, DP, Graphs) and awarded GFG Certificate + T-shirt.
- **Google Cloud Arcade (2024-25):** Completed labs and GCP challenges, earning 75 Arcade Points.
- **Hackathons:** Built and submitted functional microservices MVPs for Microsoft AI DevDays (\$480K prize pool) and Amazon Nova AI Hackathon (\$495K prize pool).
- **Community:** Active in Developer Communities (GDG Bhubaneswar) and local university tech events.
