

Anil Pradhan

Software Engineer | Backend & AI

Backend-focused Computer Science undergraduate specializing in AI-powered applications, scalable backend systems, and intelligent software using FastAPI, LangGraph, and RAG.

Education

Institute of Technical Education & Research (ITER)
Siksha 'O' Anusandhan (SOA) University, Bhubaneswar
Bachelor of Technology (B.Tech), Computer Science & Engineering
2024 – 2028 | CGPA: 8.93/10

Council of Higher Secondary Education (CHSE), Odisha
Class XII (PCM with IT)
2022 – 2024 | 85%

Experience

College Ambassador (Corporate Projects Program) | Techfest, IIT Bombay Jul 2026 – Present

- Selected as a College Ambassador for Techfest, IIT Bombay, representing one of Asia's largest science and technology festivals.
- Completed industry-sponsored corporate projects across web development, business strategy, and market research in collaboration with partner organizations.
- Qualified for Round 2 of the FlowFinance Growth Strategy & Business Development Challenge by developing a business strategy presentation and market analysis.
- Collaborated with multidisciplinary teams while delivering project submissions within defined deadlines.

Technical Projects

AI Career Mentor | Live Demo | GitHub Mar 2026 – Jul 2026
Solo Full Stack Developer

- Designed and built a multi-agent AI workflow that coordinates specialized agents (Resume Auditor, Market Scraper, Roadmap Generator, and LinkedIn Optimizer) to generate unified, context-aware career reports.
- Developed robust backend REST APIs using FastAPI (Python) for resume processing, profile history, and user settings, managing database records securely with SQLAlchemy and SQL databases.
- Integrated a Retrieval-Augmented Generation (RAG) system using ChromaDB vector database to search and recommend highly-rated study resources (YouTube, GitHub, official docs) tailored to the candidate's skill gaps.
- Created an interactive mock interview simulator featuring real-time chat, a Monaco Editor code sandbox for live coding, and automated scorecards that grade code execution and response relevance.
- [AI-Collaborative Architect]** Pair-programmed with AI co-pilots to design the high-level architecture of a startup MVP; focused on system design, multi-agent flow, and prompt orchestration, using AI to accelerate implementation of LangGraph DAGs, WebSocket FSMs, Docker, and 116 tests.

Tech: FastAPI • LangGraph • Next.js • ChromaDB • Redis • Docker • ONNX

TaskPilot AI | Live Demo | GitHub Jun 2026 – Jul 2026
Integration Lead | Team IdeaForg-E

- Integrated data connectors to pull developer tasks from 7 sources including Jira, GitHub, Slack, Email, Calendar, Meetings, and Incident trackers.
- Developed an 8-factor mathematical scoring formula to rank tasks based on deadlines, blockers, customer urgency, and business impact.
- Structured the relational database using SQLite with Write-Ahead Logging (WAL) concurrency to ensure fast, lock-free read and write operations.
- Built a WebSocket-powered chat assistant that lets engineers query schedules, update tasks, and inject urgent issues in real-time.
- [AI-Collaborative Architect]** Pair-programmed with AI co-pilots to design the high-level architecture of an 8-agent system; focused on system design, sequential DAG flows, and prompt orchestration, using AI to accelerate implementation of SQLite WAL, regex parsers, and dashboard latency diagnostics.

Tech: FastAPI • React • SQLite • Redis • LLMs

Technical Skills

Programming Languages:	Python, Java, JavaScript, SQL	AI / GenAI:	Prompt Engineering, Retrieval-Augmented Generation (RAG), Agentic AI, Multi-Agent Systems, Semantic Search, LLM Integration
Backend & APIs:	FastAPI, REST APIs, WebSockets, LangGraph, SQLAlchemy, Pydantic	Agentic AI Tools:	AnythingLLM, OpenCode, Multica
Databases:	PostgreSQL (Neon), SQLite, Redis (Upstash), ChromaDB	Frontend:	React, HTML, CSS, Tailwind CSS
Security & Auth:	JWT, Google OAuth 2.0, bcrypt, CORS, Rate Limiting	Developer Tools:	Git, GitHub, Postman, Swagger UI, VS Code
DevOps & Cloud:	Docker, GitHub Actions, Render, Vercel		

Achievements & Certifications

- 2nd Runner-Up — Dell FutureMinds AI Hackathon 2026: Secured a Top 3 finish among 8,000+ participants nationwide, advancing to the Grand Finale and presenting our solution to senior Dell leaders and corporate employees at the Dell Bengaluru office.
- Participated in GeeksforGeeks 160 Days Coding Challenge and earned a GFG T-shirt and Solved 200+ DSA problems across LeetCode & GeeksforGeeks and HackerRank.
- Certifications:** Microsoft Career Essentials in Software Development, Cisco Python Essentials 2, HackerRank Python (Basic) and Java(Basic) and SQL (Basic) and Problem Solving (Basic), IBM AI Fundamentals, Anthropic Claude 101.
- Developed production-grade AI solutions for Microsoft AI DevDays, Amazon Nova AI Challenge, and Google Solution Challenge.
- Completed Google Cloud Arcade (75+ Arcade Points) through hands-on Google Cloud labs and earned rewards from Google Cloud.
