

Anil Pradhan

Software Engineer | Backend & AI

Backend-focused Computer Science undergraduate specializing in AI-powered applications, scalable backend systems, and intelligent software using FastAPI, LangGraph, and RAG.

Education

Institute of Technical Education & Research (ITER)

Siksha 'O' Anusandhan (SOA) University, Bhubaneswar

Bachelor of Technology (B.Tech), Computer Science & Engineering

2024 - 2028 | CGPA: 8.93/10

Council of Higher Secondary Education (CHSE), Odisha

Class XII (PCM with IT)

2022 - 2024 | 85%

Experience

College Ambassador (Corporate Projects Program) | Techfest, IIT Bombay

Jul 2026 - Present

- Selected as a College Ambassador for Techfest, IIT Bombay, representing one of Asia's largest science and technology festivals.
- Completed industry-sponsored corporate projects across web development, business strategy, and market research in collaboration with partner organizations.
- Qualified for Round 2 of the FlowFinance Growth Strategy & Business Development Challenge by developing a business strategy presentation and market analysis.
- Collaborated with multidisciplinary teams while delivering project submissions within defined deadlines.

Technical Projects

AI Career Mentor | Live Demo | GitHub

Mar 2026 - Jul 2026

Solo Full Stack Developer

- Built a multi-agent AI system using LangGraph's parallel DAG to orchestrate 4 agents (Resume, Market, Roadmap, LinkedIn) with shared state, cutting analysis latency by ~60%.
- Developed a real-time mock interview engine using a 7-phase FSM over WebSockets with a live Monaco code editor and resume-personalized questions.
- Built a RAG-powered roadmap generator using ChromaDB vector search to create personalized 8-week learning paths with quality-scored resources.
- Designed a fault-tolerant backend (FastAPI, PostgreSQL, Redis) with multi-provider LLM failover and a 113-test CI/CD suite.
- Used AI-assisted development (Claude, Codex and Antigravity) to design high-level architecture — DAG structure, FSM design, and failover strategy — for solo delivery of a production-grade platform.

Tech: FastAPI • LangGraph • Next.js • ChromaDB • Redis • Docker • ONNX

TaskPilot AI | Live Demo | GitHub

Jun 2026 - Jul 2026

Integration Lead | Team IdeaForge-E

- Built the orchestrator service coordinating an 8-agent pipeline (Ingestion → Extraction → Fusion → Quality → Priority → Planning) with self-healing stale-run recovery.
- Integrated autonomous re-prioritization — a chat agent that injects new incidents and auto-triggers the full pipeline re-run in real time.
- Implemented multi-provider LLM failover (Groq → NVIDIA NIM → local heuristics) ensuring the pipeline never breaks even without API keys.
- Led end-to-end integration and deployment (Render + CI/CD) connecting 8 data sources into a unified SQLite-backed pipeline.
- Used AI-assisted development (Claude, Codex and Antigravity) to design the orchestration flow and failover architecture, while handling integration and deployment myself.

Tech: FastAPI • React • SQLite • Redis • LLMs

Technical Skills

Programming Languages:	Python, Java, JavaScript, SQL
Backend & APIs:	FastAPI, REST APIs, WebSockets, LangGraph, SQLAlchemy, Pydantic
Databases:	PostgreSQL (Neon), SQLite, Redis (Upstash), ChromaDB
Security & Auth:	JWT, Google OAuth 2.0, bcrypt, CORS, Rate Limiting
DevOps & Cloud:	Docker, GitHub Actions, Render, Vercel

AI / GenAI:	Prompt Engineering, Retrieval-Augmented Generation (RAG), Agentic AI, Multi-Agent Systems, Semantic Search, LLM Integration
Agentic AI Tools:	AnythingLLM, OpenCode, Multica
Frontend:	React, HTML, CSS, Tailwind CSS
Developer Tools:	Git, GitHub, Postman, Swagger UI, VS Code

Achievements & Certifications

- 2nd Runner-Up — Dell FutureMinds AI Hackathon 2026: Secured a Top 3 finish among 8,000+ participants nationwide, advancing to the Grand Finale and presenting our solution to senior Dell leaders and corporate employees at the Dell Bengaluru office.
- Participated in GeeksforGeeks 160 Days Coding Challenge and earned a GFG T-shirt and Solved 200+ DSA problems across LeetCode & GeeksforGeeks and HackerRank.
- Certifications:** Microsoft Career Essentials in Software Development, Cisco Python Essentials 2, HackerRank Python (Basic) and Java(Basic) and SQL (Basic) and Problem Solving (Basic), IBM AI Fundamentals, Anthropic Claude 101.
- Developed production-grade AI solutions for Microsoft AI DevDays, Amazon Nova AI Challenge, and Google Solution Challenge.
- Completed Google Cloud Arcade (75+ Arcade Points) through hands-on Google Cloud labs and earned rewards from Google Cloud.
