

Anil Pradhan

Software Engineer | Backend & AI

Backend-focused Computer Science undergraduate specializing in AI-powered applications, scalable backend systems, and intelligent software using FastAPI, LangGraph, and RAG.

Education

Institute of Technical Education & Research (ITER), SOA University Bachelor of Technology (B.Tech), Computer Science & Engineering	2024 – 2028 Bhubaneswar, Odisha CGPA: 8.93 / 10
Council of Higher Secondary Education (CHSE), Odisha Class XII (Higher Secondary) — Physics, Chemistry, Mathematics with IT	2022 – 2024 Odisha Score: 85%

Experience

College Ambassador (Internship) Techfest, IIT Bombay	Jul 2026 – Present
- Completed verified tasks across web development, event management, and creatives — including landing page builds, event ideation, and social media content for Asia's largest tech festival. - Executed marketing, outreach, and media tasks — including sponsorship communication, SEO research, and digital ecosystem mapping — as part of a performance-based ambassador program.	

Technical Projects

AI Career Mentor Live Demo GitHub	Mar 2026 – Jul 2026
<i>Solo Full Stack Developer</i> - Built a multi-agent AI system using LangGraph's parallel DAG to orchestrate 4 agents (Resume, Market, Roadmap, LinkedIn) with shared state, cutting analysis latency by ~60%. - Developed a real-time mock interview engine using a 7-phase FSM over WebSockets with a live Monaco code editor and resume-personalized questions. - Built a RAG-powered roadmap generator using ChromaDB vector search to create personalized 8-week learning paths with quality-scored resources. - Designed a fault-tolerant backend (FastAPI, PostgreSQL, Redis) with multi-provider LLM failover and a 113-test CI/CD suite. - Used AI-assisted development (Claude Code, Codex, and Antigravity) to design high-level architecture — DAG structure, FSM design, and failover strategy — for solo delivery of a production-grade platform. Tech: FastAPI • LangGraph • Next.js • ChromaDB • Redis • Docker • ONNX	
TaskPilot AI Live Demo GitHub	Jun 2026 – Jul 2026
<i>Integration Lead Team IdeaForg-E</i> - Built the orchestrator service coordinating an 8-agent pipeline (Ingestion → Extraction → Fusion → Quality → Priority → Planning) with self-healing stale-run recovery. - Integrated autonomous re-prioritization — a chat agent that injects new incidents and auto-triggers the full pipeline re-run in real time. - Implemented multi-provider LLM failover (Groq → NVIDIA NIM → local heuristics) ensuring the pipeline never breaks even without API keys. - Led end-to-end integration and deployment (Render + CI/CD) connecting 8 data sources into a unified SQLite-backed pipeline. - Used AI-assisted development (Claude Code, Codex, and Antigravity) to design the orchestration flow and failover architecture, while handling integration and deployment myself. Tech: FastAPI • React • SQLite • Redis • LLMs	

Technical Skills

Programming Languages:	Python, Java, JavaScript, SQL	AI / GenAI:	Prompt Engineering, Retrieval-Augmented Generation (RAG), Agentic AI, Multi-Agent Systems, Semantic Search, LLM Integration
Backend & APIs:	FastAPI, REST APIs, WebSockets, LangGraph, SQLAlchemy, Pydantic	Agentic AI Tools:	Claude Code, AnythingLLM, Multica, OpenCode
Databases:	PostgreSQL (Neon), SQLite, Redis (Upstash), ChromaDB	Frontend:	React, HTML, CSS, Tailwind CSS
Security & Auth:	JWT, Google OAuth 2.0, bcrypt, CORS, Rate Limiting	Developer Tools:	Git, GitHub, Postman, Swagger UI, VS Code
DevOps & Cloud:	Docker, GitHub Actions, Render, Vercel		

Achievements & Certifications

2nd Runner-Up — Dell FutureMinds AI Hackathon 2026: Secured a Top 3 finish among 8,000+ participants nationwide, advancing to the Grand Finale and presenting our solution to senior Dell leaders and corporate employees at the Dell Bengaluru office. International Hackathons: Built and deployed AI products in three international hackathons — Microsoft AI Dev Days, Amazon Nova AI Challenge, and Google Solution Challenge. Google Cloud Arcade: Completed 75+ Google Cloud Arcade points through hands-on labs on Google Cloud services, earning official rewards from Google Cloud. Certifications: Wells Fargo Software Engineering Job Simulation (Forage), Cisco Python Essentials 2, HackerRank Java / Python / SQL / Problem Solving (Basic), IBM AI Fundamentals.	Round 2 Qualifier (Real-World Business Development) — FlowFinance x Techfest IIT Bombay Growth Challenge: Designed a GTM strategy deck (platform analysis, customer personas, acquisition/retention framework) for FlowFinance (AI SMB fintech platform) with real customer outreach. 100+ Day DSA Streak: Maintained a 100+ day coding streak on GeeksforGeeks' 160 Days of Code Challenge, solving DSA problems daily — recognized with a GFG reward (T-shirt) for consistency.
